PROFESSIONAL SUMMARY

Frontend Developer with **3+ years of experience** specializing in **React.js, Next.js, TypeScript, JavaScript, Redux Toolkit, and modern UI development**. Experienced in **building enterprise applications, client-facing products,** reusable component libraries, API-driven interfaces, and responsive web experiences. Strong expertise in **frontend architecture, performance optimization, state management,** and translating business requirements into **scalable, production-ready applications**.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, Redux Toolkit, Context API.
Styling & UI: Tailwind CSS, Shadcn UI, CSS3, Responsive Design, Framer Motion.
Performance: Web Vitals (LCP, CLS), Lighthouse, Performance Optimization, Cross Browser Compatibility, SEO.
Tools & AI Agents: Git, GitHub, GitLab, Webpack, Figma, SonarQube, ChatGPT, Claude, Copilot, Cursor.

WORK EXPERIENCE

Cetpa Infotech Pvt. Ltd. (Client: DFCCIL, Noida sec-146) — *Apr 2026 – Present*

Frontend Developer — *Noida, U.P.*

Leave Travel Concession (LTC) Management Portal

- **Developed** the LTC Advance Claim and Approver modules using **React.js and TypeScript**, enabling role-based travel claim submission, approvals, and reusable interface components for enterprise workflows.
- **Integrated** asynchronous **REST services with Redux Toolkit and Axios**, ensuring reliable claim processing, real-time state synchronization, and seamless user interactions.
- **Architected** dynamic forms with **React Hook Form and Zod**, implementing schema-based validation, conditional rendering, and business rules to improve data accuracy.
- **Strengthened** frontend quality by resolving **SonarQube issues, enhancing code maintainability**, optimizing reusable components, and adapting the application to evolving backend API contracts.

Post Retirement Medical Services (PRMS) Portal

- **Designed** the **Trajectory (Claim Tracking) and Clarification modules**, enabling end-to-end visibility of medical claim status and structured communication across Employee, HR, and Finance workflows.
- **Built** role-based administrative dashboards featuring **Pending/Approved Action Tabs**, banking workflows, and approval remarks to streamline medical reimbursement processing.
- **Automated** reimbursement calculations while **integrating REST APIs** through Redux Toolkit and Axios, ensuring accurate financial processing and **synchronized application state**.
- **Standardized** reusable interface components, responsive layouts, and **Redux state management** to improve consistency, scalability, and long-term maintainability.

Big Brand Bucket Pvt. Ltd. — *Apr 2024 – Nov 2025*

Software Engineer – Frontend — *Gurgaon, Haryana*

- **Led** frontend delivery for **three concurrent web applications of a single client**, collaborating on requirement analysis, Figma implementation, and scalable interface development.
- **Crafted** interactive features including **dynamic routing**, **advanced search**, **custom filtering**, and reusable React/Next.js components to improve navigation and overall usability.
- **Boosted** application performance by optimizing rendering strategies, achieving a **100 Lighthouse Performance Score and reducing Largest Contentful Paint (LCP) to under 2.5 seconds**.
- **Translated** evolving Figma designs into pixel-perfect, responsive interfaces, ensuring visual consistency and an intuitive user experience across devices.

Cognizant Technology Solutions India Pvt. Ltd — *Aug 2022 – Feb 2024*

Jr. Software Engineer — *Noida, U.P.*

- **Collaborated within a cross-functional team** to deliver an **Angular-based Attendance Management System**, replacing Excel workflows and improving efficiency by **30%**.
- **Owned frontend UI development**, building responsive, user-friendly interfaces and integrating REST APIs for real-time data handling.
- **Implemented a calendar-based tracking feature enabling** users to view three months of attendance data, improving transparency and usability.

PERSONAL PROJECTS

Urban Stayz (Web App) – Property Discovery Platform | *JavaScript, React.js, Tailwind CSS, HTML5*

- **Crafted** a modern **property discovery interface** using **React.js**, featuring clean layouts, reusable components, and intuitive navigation for PG and rental listings.
- **Implemented** mobile-first, adaptive screens with **search, custom filters,** and **location-based browsing**, delivering a seamless experience across desktop and mobile devices.

Tune Masters-Academy – Music Learning Platform | *Typescript, Next.js, Tailwind CSS, Framer Motion*

- **Engineered** a structured **music learning interface** using **Next.js and TypeScript**, organizing course modules with reusable components and intuitive navigation.
- **Integrated Framer Motion** animations and modern interaction patterns to create smooth page transitions, visual consistency, and an engaging cross-device learning experience.

EDUCATION

Master of Computer Application (M.C.A.) ***Aug 2019 – Jul 2022***
Bharati Vidyapeeth's Institute of Computer Applications and Management *87.8%*

Bachelor of Computer Applications (B.C.A.) ***Aug 2015 – Jul 2018***
Institute of Information Technology & Management, GGSIPU *79.0%*
